

GLOBAL INVESTORS' SYMPOSIUM

OCTOBER 24, 2024

FOUR SEASONS HOTEL, MEXICO CITY

The Milken Institute is slated to host the Global Investors' Symposium in Mexico City. It is Milken Institute's first large-scale event in Mexico, designed to be an intimate and exclusive gathering of prominent executives, policymakers, and international investors to unlock the potential of Mexico's new era. The program will tackle Mexico's business opportunities and investment landscape, propelled by prevailing geopolitical and macroeconomic trends bolstering nearshoring.

MEXICO IN THE SPOTLIGHT

International Nearshoring Hub: Mexico's geographical proximity to the United States, economic openness, and scalable workforce makes it a compelling choice for companies looking to relocate supply chains amidst global disruptions, ensuring a steady flow of goods to North American countries.

Prominent Geographical Location: Mexico has garnered significant interest from global investors and entrepreneurs eager to capitalize on its dynamic opportunities, fueled by technological innovations and connectivity with the United States, while also serving as a gateway to Latin America.

Global Investor-Focused: In 2023, Mexico surpassed China as the main source of imported goods to the United States and experienced a historic influx of foreign direct investment. As global geopolitical tension continues to rise, international investors are increasingly focused on exploring Mexico's capital markets on a neutral platform convening key allocators, managers, and policymakers.

Strategic Moment: With the recent presidential election and the ongoing nearshoring boom, Mexico stands at a pivotal moment. Its strategic positioning as a key player in North and Latin America underscores the importance of charting a course toward prosperity and productivity.

Join us at the upcoming Global Investors' Symposium in Mexico and engage in one of the world's most dynamic markets, exchange ideas with global investors, and pursue meaningful collaboration to drive prosperity across Latin America.
