

# 2024 | FUTURE OF HEALTH SUMMIT

## PARTNERING FOR BETTER HEALTH

The Milken Institute Future of Health Summit convenes the best minds in the world to confront the toughest challenges in health by matching human, financial, and scientific resources with the most innovative, inclusive, and impactful ideas to drive better health outcomes for all.

Technological advances like artificial intelligence have begun to change the way we interact with our health and health-care systems. Science continues to transform how we prevent, diagnose, and treat disease—changing the paradigm from precision medicine to precision health. We continue to face a global aging population, a rise in chronic disease conditions, and deep disparities in health care. Now, more than ever, forming partnerships among government, industry, academia, health-care delivery systems, public health, nonprofits, retail, employers, and patient organizations is key to achieving better health.

The Future of Health Summit convenes annually to connect the Milken Institute's catalytic community of changemakers to advance our vision and mission to make a lasting impact in areas such as biomedical research and technological innovation, chronic disease and prevention, rare disease research, patient engagement, cell and gene therapies, mental health, healthy aging and longevity, health equity, food policy, food is medicine, health-finance trends, the role of the employer in achieving better health, and more. The Summit will amplify innovative partnerships, targeted research, thought leadership, and policy priorities emerging from the Institute's commitment to the fields of public health, food, aging, strategic philanthropy, and biomedical innovation. We invite you to join us in partnering for better health.

**NOVEMBER 13-14, 2024**
